I TOOK PE-RU-NA

Was Able to Sleep and Eat Again

Mrs. Mueller says: "I keep Peruna in the house constantly. When I am not feeling well I take a few doses. It always restores me." Mrs. Mueller's story of her experience with Peruna fully explains why she always keeps Peruna on hand. A few years ago she was very sick. The trouble seemed to be the stomach and liver. She suffered great pain. Was unable to get anything to help her. She was growing weaker and weaker. She became tired of life. Somebody suggested that she write to the Peruna Co. She did so. Through their advice she began to use Peruna. In a letter from her at this time she says: "Through the use of Peruna I have regained my health. I took only a bottle and a half when I was able to sleep and eat again and my nervousness disappeared." No wonder Mrs. Mueller keeps Peruna in the house. Under similar circumstances Peruna would be in every house in the land. Any one taking Peruna ought to have a free copy of the "Tills of Life." Address Peruna Co., Columbus, Ohio. People who object to liquid medicines can now obtain Peruna Tablets.

Egg Breakage.
In order to reduce the enormous breakage of eggs in transit, which causes an annual loss of several million dollars to producers and raises the price of eggs to consumers, extensive experiments are being conducted by the bureau of chemistry of the United States department of agriculture for determining the safest manner of packing eggs for long and short shipments by rail. The egg production in the United States amounts to about half a billion dollars annually, and the necessity of better methods of packing is shown in the fact that over nine per cent. of all the eggs received in New York city are cracked, and that a large percentage of these are unfit for food.—Popular Mechanics Magazine.

Schoolhouse With Playground Inside.
Surrounding the lot upon which it stands, the school building on Wadsworth street, Los Angeles, is a new departure in educational structures. Instead of having the playground outside of the building, it is in a large court formed by the walls. Many advantages are claimed for the novel design. The building is easily emptied in case of fire, being only one story high and each class room having direct exit to the street. Each room receives light and air from two sides.

EVERY wise farmer does what he can to save money, time, unnecessary hard work, and to have as pleasant a life as is possible.

Therefore, wise farmers buy International Harvester engines, engines of standard construction with features like the offset cylinder head, accurately ground piston and rings, extra large valves, detachable valve guides, split-hub fly-wheels—features that make them last by far the longest and save the most money in the end.

Be sure when you buy your engine that it is an I H C engine, and you will be sure of best material and best construction. They are made portable, stationary, or skidded; vertical or horizontal; air or water-cooled. Sizes range from 1 to 50-H.P. They operate on both low and high grade fuels.

Not every local dealer can show you International Harvester engines. Write us for interesting catalogues and full information, and we will tell you the name of the local dealer who handles our engines.

What's the Difference?

The difference in price between a poor shoe and a good shoe is not great; but that difference is the best part of your purchase. That difference buys comfort, service, and satisfaction not found in inferior footwear.

Use Is the Test

Ask for Rouge Rex Shoe No. 494. Look for the trade-mark on the sole.

This is a tan shoe made of full stock veal skin, with bellows tongue, and heavy sole of first quality leather. You get all you pay for in comfort and service, and save money in the transaction.
